PRINTER TO THE QUEEN'S MOST EXCELLENT MAJESTY.  
FOR HER MAJESTY'S STATIONERY OFFICE.

1877.

[C.—1725.] Price 1½d.

TO HIS GRACE  
JOHN WINSTON, DUKE OF MARLBOROUGH, K.G.,

LOLD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND,  
&c., &c., &c.

MAY IT PLEASE YOUR GRACE,

In compliance with the provisions of the Acts 7 & 8 Vic., cap. 81, 25 Vic., cap. 11, and 26 and 27 Vic., cap. 90, I have the honour to transmit, in order that the same may be laid before Parliament, a General Abstract of the number of Marriages, Births, and Deaths registered in Ireland during the year 1876.

The year marks an epoch in the later history of the country, as being the first for a considerable period in which the natural increase of population, or excess of births over deaths, was not more than counterbalanced by the number of emigrants.

During the year 26,503 Marriages, 140,438 Births, and 92,499 Deaths were registered; in the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports,) 37,587 persons emigrated. An increase of 10,352 would thus appear to have taken place in the population, exclusive of the addition by immigration. The estimated population in the middle of the year was 5,321,618.

The mean temperature at Dublin for the year was 49·5° against an average of 49·4° for the previous ten years, and the rain-fall measured 31·526 in., being 3·920 in. over the average for the ten years 1866-75.

**MARRIAGES.**—The number of Marriages registered in Ireland during the year 1876 amounted to 26,503, being equal to a ratio of 1 in 201, or 4·98 per 1,000, of the estimated population in the middle of the year. Of this number, 19,027 took place between Roman Catholics, and 7,476 between Protestants, being equal respectively to 1 Marriage in every 214 Roman Catholics, and 1 in every 167 Protestants. The average number of Marriages registered in the ten years 1866-75 was 27,366, or 5·06 per 1,000 of the mean population; the rate for the year 1875 was only 4·53 per 1,000 persons.

**BIRTHS.**—The Births registered in Ireland during the year amounted to 140,438—72,123 boys and 68,315 girls—affording a ratio of 1 in every 37·9, or 26·4 per 1,000 of the population, against an average rate of 27·0 per 1,000 for the previous ten years.

**DEATHS.**—The number of Deaths registered was 92,499—46,271 males and 46,228 females—equal to a ratio of 1 in every 57·5, or 17·4 per 1,000 of the population, being 0·3 per 1,000 persons over the average rate for the ten years 1866–75.

**Ages.**—Of the 92,499 Deaths registered during the year, 13,249, or 14·3 per cent., were of children under 1 year old, and 37,065, or 40·1 per cent., were of persons aged 60 years and upwards.

**Diseases.**—During the year, 8,820 Deaths were returned by the Registrars as having occurred from the eight principal zymotic diseases, being 9·5 per cent. of the total Deaths, and equal to 1·66 in every 1,000 persons living. The average annual number of Deaths from these diseases during the previous ten years was 12,232, or 2·26 in every 1,000 of the estimated average population.

Of the 8,820 Deaths from these diseases last year, only 21 were caused by small-pox, from which 535 Deaths resulted in the preceding year; 593 were from measles; 1,992 from scarlet fever (being only one-half the number in the year 1875, and nearly 1,000 under the average for the ten years 1866–75); 347 from diphtheria; 1,439 from whooping-cough; 2,530 from fever; 1,828 from diarrhoea, and 76 from simple cholera.

**Inquests.**—There were 2,624 inquests reported to the Registrars, being 1 inquest to every 35 deaths registered.

**Deaths in Public Institutions.**—Of the 92,499 Deaths registered during the year, 12,770, or 13·8 per cent., occurred in public institutions.

Being closely connected with the subject of Vital Statistics, Tables relating to Emigration, Pauperism, the Weather, and the Prices of the principal articles of Food in 1876 and the previous ten years, are appended.

As the general tabulation of the records of Marriages, Births, and Deaths for the year 1876 has not yet been completed, the particulars given in the following Tables, which are mainly derived from the preliminary Quarterly Returns furnished by the Registrars, will probably be found to differ, in some instances, but not to any important extent, from the revised numbers in the Abstracts to be hereafter presented to Parliament with my detailed Report on the registration for the year.

I have the honour to be

Your Grace's very faithful servant,

W. M. BURKE, F.R.C.S.P.,  
*Registrar-General.*

GENERAL REGISTER OFFICE,  
CHARLEMONT HOUSE, DUBLIN,  
22nd March, 1877.

TABLE I.—Showing for each of the years 1866–76, the estimated Population; the number of Marriages, Births, and Deaths registered, and the number of Emigrants enumerated, with the rates per 1,000 of the estimated Population represented thereby, and the averages for the ten years 1866–75.

## THE WEATHER.

The following particulars have been extracted from Returns of Meteorological Observations taken at the Ordnance Survey Office, Phoenix Park, Dublin, during the years 1866-76, furnished by Major C. W. Wilson, R.E., by direction of the Superintendent of the Ordnance Survey.

The mean height of the barometer at 9.30 A.M. during the year 1876 was 29.863 inches, against an average of 29.932 inches for the preceding ten years. The highest reading during the year (30.626) was on the 15th January at 9.30 A.M., air calm, and the lowest (28.451 inches) was on the 4th December at 3.30 P.M., wind S.W.

The mean temperature for the year was 49.5°; the highest registered was 92.3° on the 16th July, and the lowest was 21.3° on the 21st January. The average mean temperature for the years 1866-75 was 49.4°.

Rain or snow fell on 201 days during the year, against an average of 194 days for the preceding ten years, the amount being 31.526 inches, or 3.920 inches over the average annual rain-fall for the ten years 1866-75.

The prevailing wind was the W., it having blown from that point on 85 days at 9.30 A.M., with an average pressure of 2.51 lbs. per square foot. The wind blew from S.W. on 74 days; from E. on 47 days; from S.E. on 38 days; from S. on 30 days; from N.W. on 28 days; from N. on 24 days; from N.E. on 19 days, and the air was calm on 21 days, at 9.30 A.M. It will be noticed that, as was also the case in 1875, easterly winds were more frequent than usual, the number of days on which it blew from one of the three points N.E., E., and S.E. at 9.30 A.M. being 104, against an average of 77 in the ten years 1866-75. The strongest winds (S.W.) were on the 22nd January, 23rd February, and 31st December, the pressure being 16 lbs. per square foot.

## Topographical Description of the Eight Divisions into which Ireland has been divided in the foregoing Tables.

**No. I., THE NORTH-EASTERN DIVISION.**—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

**No. II., THE NORTH-WESTERN DIVISION,** is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

**No. III., THE EASTERN DIVISION,** is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenpoint, in the county of Down, to the south of Cabore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

**No. IV., THE NORTH MIDLAND DIVISION,** is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

**No. V., THE SOUTH MIDLAND DIVISION,** situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galtee mountains, and in a north-westerly direction, to Pellaugheen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

**No. VI., THE WESTERN DIVISION.**—This division extends southwards from Sligo and Killybegs Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benvea Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 190 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castleknagh, Glemamaddy, Mountbellew, Ballinacree, and Portlanna.

**No. VII., THE SOUTH-EASTERN DIVISION.**—This division extends from its junction with the "Eastern" division, southward of Cabore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the "South Midland" division. It embraces the county of Waterford, nearly the whole of the county of Wexford, parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (88,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork county.

**No. VIII., THE SOUTH-WESTERN DIVISION,** extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.
